## AN ALTERNATIVE FORUM FOR DISPUTE RESOLUTION - SICC FIVE YEARS ON

Five years on from the launch of the Singapore International Commercial Court (SICC) in 2015, the SICC has grown steadily as a preferred forum for international dispute resolution. The SICC has been well received by the international legal community not just for the quality of judgments, but the unique and flexible features and practices of the SICC have resulted in the Court being described as 'arbitration in litigation', where one may have the benefits of arbitration but with some added advantages of litigation, and possibly a faster turnaround time. What's more, even in the midst of the current COVID-19 pandemic, the SICC has implemented practices that have permitted case management conferences and hearings to proceed expeditiously.

Join us in this webinar to discover the SICC's developments and achievements over the past five years, and how it may prove beneficial to legal practitioners and in-house counsel seeking cost-effective options for dispute resolution. Listen to the eminent panel as they share their experiences in the SICC and discuss what the future holds for the Court in particular, and international commercial dispute resolution in general.

This is an initiative of the Foreign Lawyers Chapter (FLC) of the SAL Professional Affairs Committee (PAC).
